Executive Council of A. F. of L. Asks Citizens to Join in Campaign Against Volstead Act.

PROHI AMENDMENT IS NOT CRITICIZED

But "Reasonable Interpretation Making Law Enforceable" Is Object Sought, Is Statement.

By the Associated Press Washington, February 26 .- Repeal of the Volstead prohibition enforcement act and substitution of a measure permitting sale of light wines and beer was urged today by the executive council of the American Federa tion of Labor in a statement which called upon all citizens to join with labor organizations in a campaign with these objects in view. The statement denounced the Volstead act as "a social and moral failure," and "a dangerous breeder of discontent

and contempt for all law." The council, which concluded week's session Saturday night, previously announced its intention to participate in the congressional elections through a non-partisan campaign committee which will indorse and oppose candidates of major political parties, or enter independents if that course is considered most effective.

Probe Conducted. "Before this decision was reached, the council's announcement said "there was caused to be made an exhaustive investigation of the Volstead act. It was shown by this investigation that there had been a general disregard for law among all classes of people, including those who made the

While discussing business condi-tions in the United States in general, and the sugar industry in particular, Fred Mason, of New York, vice president of the American Sugar Refining company, and known as "Henry W. And the legion's representatives will inform President Harding delay will arouse the wrath of the veterans.

Heretofore the legion has been powerful influence in shaping legislation. With the entire membership of the house coming up for re-election in November, it may be able to force the ways and means committee from its apparent desire to put off a decision.

Tuesday, for the purpose of aguin tackling the problem, which has been little clarified during the two weeks its has been under consideration. No satisfactory method of raising the necessary revenue has been devised. Sentiment favors utilization of the bonds of foreign governments, when they will have become available t for through the funding of debts.

> Under this scheme, it might also be possible to utilize funds saved rived from the sale of surplus government property, large quantities of which are scattered throughout the country. A bill based on this plan would simply authorize payment of the cash bonus from funds not otherwise appropriated.

But this would spell delay, because it is uncertain when bonds will be available, and would, therefore, be unsatisfactory to the service men. It would likewise encounter the opposition of President Harding and Secretary of the Treasury Mellon.

The senate has neatly sidestepped the difficulty by passing the question to the house, and there has been no constructive work in the upper chamber. Moreover, sentiment there has apparently been growing against the passage of any sort of a bonus,

Smart Day Frock.

A brown gabardine frock is one of the smartest day frocks in the troussean. It is embroidered in broderie anglaise in beige and brown silk and has a brown silk girdle and a beaver collar, while the vest is pink georgette and lace.

For wear over the wedding dress in driving to the abbey is a lovely Bossian ermine stole wrap, very wide on the shoulder and giving the effect of a cape with stole ends. There is a fringe of ermine tails round the neck and at the back of the cape and stole, and it is lined with white brocaded velvet and covered with white chiffon. There is another ermine stole two yards long and fourteen inches wide, lined with white crepe de chine. The going-away coat is of moleskin, with alternate strips of the fur running reverse. The set-in sleeves are kimono shape, and there are six rows of the fur treated as bands at the foot of the coat. A mole pillow muff will be carried with this coat.

Magnificent Shoes.

Magnificent Shoes. In North Audiey street is that very quiet and unimposing shop of Albert Welch, whose grandfather made shoes for King George IV. and other members of the older generation of the royal house. Today he is supplying Princess Mary with some of her most important footwear, including a pair in peerless white satin woven at Braintree and destined surely for the greatest of ceremonial occasions, inasmuch as they are to have a pair of lovely diamond buckles, given by Queen Mary, set amid a black pleating of tulle and

chiffon.

These shoes represent the highest craftsmanship of this country in their faultless finish, as do two other pairs in the richest gold brocade and silver

set amid a black pleating of tulle and

in the richest gold brocade and silver figured satin.

Princess Mary wears shoes cut on the smartest lines, but without any exaggeration. The heels in no case exceed one and three-quarter inches in height. Two pairs in what is technically described as "dual style"—that is to say, with straps that are cut in one with the rest of the upper—are in gray antiques and broom sude. are in gray antelope and broom suede. respectively. One pair in silver tissue and in white antelope for court wear, and for walking, some pairs in gray and brown in the oxford style.

Likes Small Hats. Princess Mary, like her mother, has a standing order that neither para-dise plumes nor ospreys shall appear in her millinery. She very much in her millinery. She very much likes the present style of small, closely-fitting hat, rather sharply turned up from the face. An effective exam-ple on these lines, a part of the trousple on these lines, a part of the trous-seau. is in black satin, upon the up-standing brim of which are set flat, conventional daisies in jade green, tip-ped with gold. Most becoming is a swathed turban in gold tissue, round which are folds of this beautiful fabric shot with blue, rose and a delicate green, drawn together in a large chou at the side.

There is one hat which has the very latest novelty for trimming in a spray of flowers formed of small shells tinted with pink and blue upon a shape having a raised brim in sapphire blue velvet, lightly veiled in gray lace. A black cire satin hat has a long trail of the small flowers of the borage plant in its curious tones of blue. For country wear is a hat of rather mush-room shape in green suede with narrow ribbons on green and gold, and similar in style is another in fuchsia shading.

Women Meet Today.

A meeting of the women of Atlanta was called by Mrs. Albert E. Thornton, Sr., president of the Atlanta ta Federation of Women's Clubs, and Mrs. R. M. Striplin, chairman of the ward committee.

The meeting is set for 9:30 Monday morning, and also will be held at the chamber of commerce. Every women'ns organization in the city is urged to send representatives.

The aid of the men's aid clubs of the various churches is also sought. General and other campaign leaders will address these clubs, with a view to getting their members not only to increase their subscriptions, but also to gain their active services for the rest of the campaign.

"We are depending greatly on church members and church workers for support and help in the closing days of this campaign," said Mr. Browniee. In vitations have been extended by the men's clubs to have speakers appear before them and willingness has been expressed to participate.

Up to Friday the complete list of subscribers showed that 2,578 persons of firms have contributed to the drive. Other subscribers showed that 2,578 persons of firms have contributed to the drive. Other subscribers showed that 2,578 persons of firms have contributed to the drive.

S. D. Warriner, chairman of the policies committee, which adjourned its meeting in Atlantic City today, said it was the unanimous feeling of the operators that there must be a deflation in coal prices, and that the mine workers, for the sake of their own prosperity and the general good all around, must share in this deflation.

Mr. Warriner, who is president of the Lehigh Coal and Navigating com-pany, told newspapermen that the At-lantic City meeting was held to con-sider various phases of the present labor situation in the anthracite fields. labor situation in the anthracite fields. It was in reply to a question whether the operators would ask the mine workers to accept a reduction in wages, at the expiration of the present contract on March 31, that he indicated the miners would be asked to readjust the present wage rates. RIVAL FACTIONS IN GREEK CHURCH NEAR BLOODSHED

Cleveland, February 26.—The arrival of Bishop Joseph Schrembs and Monsignor T. C. O'Reilly, of the Cleveland diocese, is believed by the police to have averted bloodshed when a mob of several hundred attempted to storm their way in a Greek Catholic church at East Twenty-second street and Scoville avenue here, from which they had been barred by a rival faction this morning. A riot call had taken six flying squadrons to the scene.

The hostility between the two factions had its origin, police say, when a restraining order was obtained by one group in common pleas court several weeks ago to prevent Father Joseph Zakack from preaching. Father Andrew Koman was then installed as head of the congregation.

Tickets were issued to today's services, at which Bishop Schrembs and Monsignor O'Reilly were scheduled visitors, and the deposed faction, angry at being barred, attempted to force the doors. Police dispersed the crowd and stationed a guard at the church. Services were suepnded for the day.

Little "Tilde McCormick's fellow is a good scout. Furthermore, if it's all right for Fifth ayenue, Lake Shore drive or Euclid avenue to entertain penniless and discredited members of broken-down European aristocracy and permit their daughters to marry such men, Max Oser need not apologize to "society" for seeking the hand of John D.'s granddaughter.

After trailing Max Oser for several daya and conversing with him for an hour, I am satisfied that the chase was worth while, and the time well spent. He's worth knowing and his dignity restraint and pleasant humor seem explanation enough, why the little 16-year-old franddaughter of the richest man in the world decided to marry him.

The best compliment I can pay him.

Thirty Years of Service Managing Estates

KNOWING WHAT TO DO-HOW TO DO IT-WHEN TO DO IT-AND DOING IT, RIGHT

SATISFYING EVERYBODY INTERESTED

You Have a Wife and Children

You love them and are striving to accumulate something to leave for their support and comfort after you "pass on"?

You are wondering how you can manage so that they will surely get the benefit of your labor?

Then don't fail to read every line appearing each Monday this year, under the above head.

We have had Thirty Years in which to study this question. We have studied it faithfully and thoroughly, not only from the standpoint of our own experience, but also with respect to the administration of estates under the general law. Administrators are held strictly to the arbitrary requirements of the law. They have no discretion. Unnecessary expenses are incurred, family dissensions frequently result and alas, too often the estate is partially or totally lost, through ignorance, bad judgment or mismanagement.

Remove the Hurdles From The Path of Business; N. Y. Editor Tells How

"Thirty years ago it may have been necessary to reorganize our code of business ethics. Today it is necessary to effect another reorganization to meet the complicated conditions of modern business enterprise. Thirty years ago we were not even considered a world power. Today we are

Herewith is reproduced an article from the pen of Russell R. Whitman, editor and president of The New York Commercial, one of, the leading husiness newspapers of the country. In it he makes an appeal to "reconver the hurdles from the path of business," and suggests that the best way to do so is to repeal the Sherman law, the Clayton law and other restrictive measures, "and in their place should be written laws helpful to honest business."

Editor Whitman will find, no doubt, that practically everybody agrees with him about clearing the hurdles from the path of business, but whether he will find many who will agree with him as to his method is another question. His appeal will, of course, meet with strong opposite the strain of the considered unlawful just because it is big, nor shourd little business, and is as follows:

"Clear the hurdless from the path of Business."

"Clear the hurdless from the path of business should be removed from the statute books, and in their place should be written laws helpful to honest as ituation existing at that time has arrivent cital believes the considered unlawful just because it is big, nor shourd little business be considered unlawful just because it is big, nor shourd little business be considered unlawful just because it is big, nor shourd little business be considered and the considered the strain of trade." Restraint of competition has been deemed to be "restraint of trade," and so it was written into the law. It provided no elasticity. Attempts to enforce the law according to its letter proved it to be unworkable, and so the supreme court wrote have been necessary to reorganize our code of business thick each of trade. The surface of the surface of the business would upon one of trade, and so it was written into the law. It provi business to seek similar consideration.

World's Fair Would Bring Stop-Over Privileges for Atlanta Says McClure

C. W. McClure, well-known mer-chant and business man of this city, had the following to say a few days ago about stop-over privileges for At-"Very few people understood the

advantage of the all-the-year-stop-over privilege, and the great annual loss that Atlanta and the south are sustaining every year on account of Atlanta's not having this privilege. "Cincinnati, St. Louis, Chicage, Cleveland, Washington, Baltimore, Phildelphia, Buffalo, and several

more large cities have had this privilege for years. "What is Atlanta's loss in this mat-What is Atlanta's loss in this mat-ter is also the south's loss. To illus-trate, a merchant living in south Geor-gia, Alabama, Florida or Mississippi, decides to go to the eastern or cen-tral cities to buy a bill of goods. He buys his ticket in his home town, and on account of time limit on same he cannot stop over in Atlanta more than a few hours at most. This does not give him an opportunity to see what the Atlanta wholesale merchant has in

the Atlanta wholesale merchant has in stock, and right here is where it is his and the Atlanta merchant's loss. For there is no element of doubt that with the great stocks of goods carried by the many different wholesale houses in Atlanta, which buy in great quantities and mostly in carload lots, they could in most cases, sell as cheap, and in some cases, cheaper, than the more distant cities. But where the price and the goods are the same, the buyer will save in difference in freight buyer will save in difference in freight and time; and he is also buying from firms that are more in touch with him than people a thousand miles or more away.

"There are many merchants all over the south who make an annual or semi-annual trip to the market. Nobody wishes to interfere with their over the south who make an annual or semi-annual trip to the market. Nobody wishes to interfere with their plans, but if they had the opportunity to stop over and see what the Atlanta wholesale merchants have to offer, they could then continue their journey, compare prices elsewhere, and buy wherever it was to their interest to buy, either going or returning. Any plans, but if they had the opportunity to stop over and see what the Atlanta wholesale merchants have to offer, they could then continue their journey, compare prices elsewhere, and buy wherever it was to their interest to buy, either soing or returning.

a great many commodities, and as previously stated, the buyer saves, and Atlanta sells more goods. This pro-vides more employment for Atlanta and southern people, as the Atlanta wholesale houses are heavy buyers of southern-made goods, especially in the textile lines.

"We are told that Atlanta has tour-ist stop-over privileges. This is very well as far as it goes, but it does not go far enough. Everybody is delight-ed to know that we do have thou-sands of winter tourists who stop over in Atlanta look us over get a good in Atlanta, look us over, get a good impression of our city, and then go on elsewhere and spend their money; but the southern merchant does not, as a rule, go to the market at the season of the year when the present stop-over privilege is in force, as the crop conditions in his section are not far enough advanced at that time for him to know just what and how much he wishes to buy. As a result, when the privilege is in force he can not use it and when he does need it not use it, and when he does need it

not use it, and when he does need it he cannot get it.

"Then, again, if the winter stopover privilege is good for the northern tourist, in the season of the year when it is to his advantage and pleasure to come south, would it not be just as good for the southern traveler who finds it best to go north in summer-time when it is to his advantage and pleasure to do so? It is a rare instance, indeed, where a man or woman living in this part of the country, having occasion to pass through tvy, having occasion to pass through Atlanta, would not be glad of the op-portunity to see the city, visit friends or relatives, see the cyclorama and parks, or take a side trip to Stone mountain.

There is a silver lining to every test, and the work begun a year interest in the state, ago, the city would have been compelled to pay much more for the improvements contemplated than it will now have to pay, and in ad dition to that the bonds would have brought very much less then than they will bring today.

Considering the saving from both of these angles, the delay has meant a saving to Atlanta of as much probably, as half a million dollars.

As to providing work for the unemployed, that comes better late than not at all; so that we have much for which to be thankful in the fact that the cobwebs are clearing, and that the anvil, the hammer, the saw and the trowel will all soon be more active on municipal improvement undertakings than, probably, at any previous time in the history of the city!

The good effects of the expenditure of \$8,500,000 of bond money in Atlanta cannot be over estimated.

No other city between Washing ton and New Orleans has ever spent that much money at one time on municipal improvement enterprises.

It is the biggest thing Atlanta ever did; and The Constitution derives infinite satisfaction out of it all because this newspaper first proposed the bond issue, and because its campaign brought about victory from what at first was said to be an impossible under-

SERVICE FOR GEORGIA.

The rural development of the state is to be considered from every standpoint at the annual meeting of the Georgia association, to be held in Atlanta on March 1 and 2-a meeting which promises to prove of unusual state-wide im portance.

At this meeting every phase of the activity of the organization related to the methods it employs in bringing energetic diversifica tion and live-stock farmers into Georgia from the north, east and west will be explained and discussed; and the recital and reviewing of what has been done will inevitably serve to impress upon the public mind an apprecia tion of the much greater benefits that will follow if this organization is accorded support in full keeping

with its deserts. The real purpose of this annual meeting is succinctly set forth by President H. G. Hastings, of the Georgia association, as follows:

"This is in no sense a hot-air neeting. Georgia has serious problems to solve. We need new people and new capital to help solve Toward this end the Georgia association has been doing serious, hard work with the limited resources supplied. We are in the children. ouch with many prospective settlers from other states, mostly experienced live stock farmers. are convinced we can bring many of them to Georgia. We need to co-ordinate our efforts and work according to the best plans to bring them here in large numbers. To an extent, we must have standardized methods for offering farms. Prices must be stabilized, terms of nurchase must be uniform and our citizens, officials and others must welcome the newcomers and make The same is true of the sewer system extensions contemplated by the bond issue.

The happy termination of the controversy over the Spring street viaduct project means that this great improvement will soon be put under way, and that the work will be nearing completion by the end of the year.

The general approval of the active to the start of the inflow is the time to get ready. At this meeting we want to show just what the synchroly of the active to the put project means that this great improvement will soon be put under way, and that the work we expect all the end of the year.

Seen and Heard in Washington BY JAMES A. HOLLOMON ...

Washington, February 26.—(Special.)—Few people realize, perhaps, that there is a world-wide serious movement today to change or remedy all calendar defects—and that the American congress has before it two bills to that end, one to improve the calendar by separating "New Year's day" from week-day names; the other to divide the 52 weeks into 13 months of four weeks each, the additional month to be called "Sol" (what a boost to the Hebrews!) and to fit in between June and July.

So serious has this movement become that—now listen—

The Canadian government and Royal society have unanimously indorsed the proposal and recommended an international conference for that purpose; and the vatican authorities in Rome are assembling leading astronomers and church authorities in April to expedite the improvement; and a nation-wide conference was held in this city last week to further the change, at which were assembled in this city last week to further the change, at which were assembled in fluential men, among whom was Moses B, Cotsworth, F. Or, why not call it "Junk?"—but, of course, that would never do—Ahyway, it is a serious matter; and we should give it serious thought before we let the valendar-tinkers get too far with this "Sol" business.

In all frankness, this is no jesting matter. That is why I am writing so menter in all frankness, this is no jesting matter. That is why I am writing so me world wide standardized changes in our calendar system.

Let me name some of the defects, as pointed out by the proponents of the bills now pending in congress:

1. We earn and pay by the month, but have, not an equal-monthly measure—except for prisoners jailed to serve equal-monthly masses at the only class who know what a month is?

2. Our months vary 28 to 31 days long;—11 per cent difference—yet, the same monthly salaries, rents, etc., are incquitably paid. All of which was done!

There is going to be some oppo-sition to this 13th-month idea. Our colored brethren would never agree to it on the basis of superstition— and, of course, the republican majori-ty in congress will not keep up the record of flaunting the negro vote ad record of flaunting the negro vote ad libitum. BEYOND.

Keep looking ahead-beyond. The onger you look at the nearby troubles and annoyances of your life, the bigge and more impassable they become. Unless you look beyond today, you

pegin to surrender all that you are and have. It is possible for a human being to get tangled up in himself by think ing and brooding too much on his immediate affairs.

By looking beyond we get the proper perspective on ourselves and others as well. Greatness is rarely appreciated as walks around each day. You have let it get at a distance where you

re able to see it in all its values.

The man who builds his home does for his own family's comfort and for those who will sometime take

those who help build them No matter what work engages

time from day to day, you must keep looking beyond your special duties or else you cannot grow. Plan in the beyond! To have ideals and then to make

hem symbols of our extended vision, will help to nourish the heart of us when it becomes faint, and keep our footsteps straight ahead. The world only looks good as we

d-cide that it is good, and try to put something good into it. We really live only as we help others to live. And that always means

that we enter into larger enterprises far beyond our own little spheres. The possibility of world peace is for hose beyond us who will not have known the terrible night of waiting and watching at the banks of rivers flowing with tears.

K. E.

Answer. Well, every baby has to cut his teeth sooner or later, and it isn't his fault that there happens to be an eye tooth now and then in the outfit. Attributing illness of any kind to the physiological process of cutting teeth is just as unreasonable as it is to attribute any disturbance of the health to the physiological process the health to the physiological proces of the "change of life."

results? Mrs. E. L.

Answer. It is a stimulant to the function of the thyroid gland, and hence its effect is to increase metabolism; and probably aid in burning up and eliminating from the body various inflammatory deposits; it tends to reduce weight; sometimes causes a condition resembling coryza or head "cold" and hoarseness, sometimes a skin rash. It is by no means harmless and should not be taken at all unless under medical supervision. Selfmedication with so-called "rheumatism" remedies containing iodide often does much harm and seldom does any good. LABOR INTERESTED

Washington, February 26.-Pursuing the policy instituted in 1920, the American Federation of Labor, through its non-partisan political

through its non-partisal political campaign committee, will enter the congressional primaries and elections this fall, with the object of obtaining the nomination and election of candidates fayorable to organized labor.

This decision was announced last night by Samuel Gompers, president of the federation, at the conclusion of the quarterly meeting of the federation's executive council.

"It is proposed to go into the primary elections everywhere to make certain that candidates favorable to the rights and interests of the workers are nominated," said the announcement. "Labor will place such candidates in the field, wherever necessary.

It need occasion no surprise if there are in many districts candidates placed in the field by labor as a direct result of antagonistic attitude on the part of candidates in both the republican and democratic parties. In the opinion of labor the present political and economic situation makes imperative the most energetic political action."

Mr. Gompers declared the campaign committee doubtless would be guided in its work by the issues involved in the unemployment situation and the possible methods of alleviation which the government might adopt; in the use of court injunctions in labor disputes; in the elimination of tax systems which "remove the burdens from the rich and predatory and place them on the shoulders of the poor," and in the general field of labor legislation. In this connection he declared congress was in the midst of an amazing kind of muddling with tax and tariff questions, where little regard is had for the great masses of our people, and was "no more constructive in dealing with transportation than it has been in other fields."

State labor organizations were said by Mr. Gompers to already be preparing details of the campaign and the standing campaign committee was authorized by the executive council to take up and co-operate in the work.

Before concluding its quarterly session, the council also adopted a resolution opposing the national woman's party constituti

Gompers said the step was taken because of the danger to legislation guaranteeing working women and minors special consideration.

INCOME TAX ALARM

Says State Is Not Awake to the Dangers of Proposed Tax Changes.

Marietta, Ga., February 26 .- (Special.)-In speaking to the Rotary club at Marietta concerning the proposed state income tax, Charles J. Haden said, in part:

"Waiving for the present other reasons why the state should not reasons why the state should not reasons why the state should not adopt the income tax, I wish to point out two, either of which is sufficient to prevent its adoption.

"Industries that give employment to people locate wherever they find the greatest inducement. Those who contemplate the building of a factory or the establishment of a dairy, or any other one of the many enterprises Georgia needs so much, would not invest their money in a state which takes a toll on their earnings, plus a property tax, while there are states around which do not put upon them the extra burden of income tax. Republic Sales Corporation Sends Open Letter to the Mayor.

A conference will be held Monday orning at 10 o'clock in the office of Mayor Key, on the call of the mayor, for the purpose of considering recom mendation for the purchase of six White trucks for the sanitary department, one White truck for the water works department, and four Armleder trucks for the streets depart

These recommendations were epted by city council, but that calling for the purchase of the Armleder machines was reversed by the board of alderman, and Mayor Key has now held up all purchases pending an in-vestigation. Summoned to the confer-ence Monday morning are the heads of the three departments involved, the city purchasing agent, and the su-perintendent of the municipal garage. The mayor claims that the Armlede trucks were quoted to the city at a price \$140 in excess of the price asked

ted in the report that accompanied the purchasing committee's recommen-dation to the finance committee, who dation to the finance committee, who cut down the quantity of trucks recommended by the purchasing committee but otherwise followed the purchasing committee's recommendation.

"If Republic trucks were purchased for the revised quantity approved by the finance committee, the saving to the city would be \$1,219 per truck on the 3½-ton trucks, or a saving of \$7,314; and on the 2½-ton trucks of \$1,000 per truck, making a total saving on the ten trucks for the sanitary and street department of \$11,-

Says Sumter Boys Were First to Plant War Memorial Trees

Taking exception to the statement that planting of the memorial trees in Fulton county in honor of the war heroes of Atlanta and vicinity was the first exercise of its kind in the state, Mrs. Fred Arthur, of Americus, Ga., has written to The Constitution saying that trees were planted on Armistice day in Americus in honor of the world war soldiers of Sumter county. The exercises were conducted by the boys of the Christian Endeavor Society of Americus.

Stating that she could not let any-one "steal the boys' thunder." Mrs. Arthur explained that she wished to correct the statement made in the Atlanta papers that the Fulton county function took precedence over all others of its kind in Georgia.

The boys who carried out the exer-cises in Americus are from 9 to 14 years of age. They were unaided in securing the trees or planning the occasion. Certificates are held by them from the Forestry association in Washington for the eight trees plant-d, Mrs. Arthur writes.

the Hotchkiss drive system. The fea-ture of the Hotchkiss drive system is the utilization of the front half of the utilization of the front haif of each rear spring to connect the axle to the frame. The spring, if properly designed and mounted, accomplishes this function in a very satisfactory manner, thereby saving 70 to 100 parts, which compose the radius rod and the Torque arm equipment used on other makes of trucks. It used on other makes of trucks. It is a leading feature of the Republic policy to avoid unnecessary parts, not only for their cost, but for their weight, and their invariable increase

of maintenance, attention and expense.
"Our method of manufacture may not conform to the individual ideas of construction, but comparative tests of Republic trucks in the city service will prove their dependability, and we have repeatedly stated that we welcome comparison under any condi-tions where the opportunity is equal. Perhaps it is not the city's intention to save money in the purchase of 238.31, a saving of over \$1,000, there, making a total saving to the city on these units of over \$12,000 on the eleven trucks.

"Meets Objections."

"The objections stated, when the bids were opened, to the Republic was the ebsence of radius rod. This is rendered unnecessary by the use of requirement; or there may be some question as to the dependability of Republic trucks in the city service. Sales corporation is willing to eliminate the question by furnishing an equitable guarantee that our trucks will properly perform the service required of them."

Who's Who and What's Happened.

Richard Brabant, a successful young lawyer, has suggested a year's leave of absence
for his bored wife,
Sally, hoping that she will learn enough
of life to become less a butterfly and more
a helpmate. She begins by meeting a childhood friend,
Keith Gilbert, always labeled "dangerour," while on her way to tea with
Barbara Lane, an old-fashioned wife, and
Patricia Loring, a modern fiapper, who is
sout to capture Gilbert, and is surprised
when, at a big costume ball, she meets Sally

Her voice was not breathless with delight and surprise now when he called her, as it had been a month ago. "Lunch with you? Oh, I can't; I'm doing something else, though I can't just remember what it is. And this evening's gone too: Barbara Lane phoned me that the work of the crowd at Lee's, or telephone where to dance.

In vain Barbara reminded herself that she would have had a new frock if Andy and she had not saved all their money to put on their little home, "Weeacre." Her anticipations fell flat as a cold popover. She had looked forward so eagerly to this treat—to having dinner in town, and going to the theater. Andy could going to the theater. Andy could never have afforded it if it had not been in the interests of the business. But now, with Sally, sleek, beautifully cared for, making one of the party, she wished that she could run home. And when they reached the hotel where they were to meet her husband. where they were to meet her husband, and she saw him standing in the lobby with an erect, good-looking man beside him, she turned hot with humiliation. Stabb's face was serious.

"John, I don't mind telling you this man Rasher is getting on my nerves."

"You're overworked, Jim. What you need is a rest. I'll take care of him."

"Yes, that's what Romisky said, and see what happened! That's what Hornblend said, and now he's a hopeless invalid eating his heart out because some money got way from him."

It was on Mr. Stabb's lips to tell Harpy of his own encounter with Rasher—that he had been knocked, down in his own office—but his pride rebelled. Since the incident he had never heard mention of it, so he presumed that Rasher, for some reason known only to himself, had never told.

Instead he remarked:
"You know the mill people have the notion that there's something—well, unusual about Rasher. They say he brings good luck. Take that row of shaces up the street here. For nearly a week Snub and Bill rolled out of bed early in order to keep watch over the Professor's house. Then one morning their watch was rewarded. Bill saw the milkman take a paper out of the bottle, read it, crumple it up, and throw it down by the porch. As soon as he had gone, Bill grabbed the note and dashed over to Snub's house. His whistling finally brought Snub down. Excidedly the "deteckatives" opened the paper and read, "Leave a pint of cream tomorrow."

TRIMMINGS THAT HELP.

The minds of the French dressmakers are as ever fertile for the
invention of new and suitable ways
to trim new frocks.

Not for many years have buttons
been used so effectively or so pleptifully. Often expensive carved buttons
are used on spring jackets.

Often small buttons, sometimes of
glass, are sewed on sheer materials
with bright-colored floss. This makes
a dainty trimming.

With the vogue for Russian styles
comes the use of much cross stitching.
This is done in simple or elaborate
designs in a single contrasting shade
or in many. One thing that distinguishes the dark blue and black
dresses this year from those of a
season ago is that those of this season
are usually lightened up with color
in the trimming. Often a simple
frock of navy canton shows cross
stitching in Russian colors at the neck
and cuffs.

and cuffs.

We should class as embroidery the use of narrow grosgrain ribbon countied on the fabric of some of the new frocks to form a floral decoration.

This gives a chance for an unstal and interesting color touch. A white taffeta evening frock is treated in this way with a floral design of soft mauve rose blue and vellow ribbon. mauve, rose, blue and vellow Nacre, or mother-of-pearl, is much in evidence at the recent Freich openings. Rings or sequins of narre are sewed on to sheer tissues in interesting designs, and nacre flowers are also used.

The match-stick decoration heretofore seen only on hats has been induced on dresses.

Gingham cutouts are used on navy blue tricotine. And these are applied with navy blue embroidery silk.

broke in upon the silence, and she dropped to her knees, flattening her ear against the keyhole. The muffled murmur of a man's voice and the woman's lighter tones came to her, but that was all; no word was audible. The girl's glence rested upon the man. The girl's glance rested upon the man-tal and she rose, measuring it with a shrewd eye. It occupied the same relative position in the wall as the fireplace in the adjoining room. Instantly she was crouching upon the hearth, bending far over the gas log. The murmur became a rumble and—yes! Words came to her at last in the man's angry tones!

On the threshold she halted with a hittle sob of surprise and sudden hope. There was a door at the farther end. Someone was whistling on the other side of it. The suite had evidently been a larger one and the door must connect with another bath or bedroom. If the sound of that whistle could penetrate this door, forgotten by the woman who had made her prisoner, then it must be a mere panel which could be easily forced. With an apprehensive glance over her shoulder, Phyllis seized the knob and shook it desperately. The whistling stopped abruptly.

Her breath came in short, panting gasps as Phyllis guided her to the elevator and lowered her carefully to the cushioned seat. The woman fumbled with her jeweled bag for a moment then handed it with a helpless testure to Phyllis, who opened it and took out a key with a round brasstag. When they alighted at the fourteenth floor the woman seemed to lean less heavily on Phyllis' arm.

"My restorative—small blue bottle—bathroom shelf," the woman gasped. "In there, through bedroom—"
Phyllis flew to do her bidding, but to bottle stood upon the shelf. She to open the door of the medicine lest; nothing but toilet articles met brood for a moment gazing about her when a sharp metallic click from the outer room caught her ear and, turning, she sped back into the drawing room. The erstwhile invalid stood with her back against the locked entrance door, calmly thrusting the key into the bosom of her gown.

"Now, sir. There was no message left for anyone, but Miss Blackton went away very suddenly. There is no forwarding address either."

This niformation came as no surprise to Waddy, but at least, ne had ascertained her name. Arriving at home he routed out the passenuger list of the Tritonia; Miss Ursula Blackton went as the prise to Waddy was in his rooms trying to decide what move to make next, when a commotion in the hall suddenly foused him. Sam was a scuffle, a thud, and into the room there burst a wild-eyed, haggard man in disheveled evening clothes.

"What have you done with her? Tell me, man, or T?! kill you with my bare hands!" shouted Captain Gore-Pevensey. "What have you we was the prise to be a with her? Waddy stammered.

"I haven't the least idea to what you refer, but if by 'he' Nou mean Mr. Wadsworth, I can assure you that he is as much in the dark as I am concerning the reason why you and your friends should have anneyed and attacked him."

"The woman studied her for a moment in silence."

She was edging herself around the table toward the girl, her white face working with fury, when the muffled tiakle of a telephone bell broke the corner and lowered the lid. A telephone was revealed and with her eyes still holding Phyllis she took the receiver from its hook and spoke rapidly. "Yes? Who is it? Permit him to come up at once, please!"

Phyllis sprang forward, but the woman, turning, seized her by the shoulders in an iron grip.

"Now, my dear, you shall be made to tak!" Her tone had changed again and the girl recognized a strident note of triumph and exultation. "Go into that room and wait until you are wanted!"

"A subdued thud as of a closing door broke in upon the silence, and she dropped to her knees, flattening her."

"The care!" Waddy faced the other ams squarely. "Tm listening to you only because I've got a hunch we working at cross purposes, and something may have happened to Miss Kildare."

"You're a ripping actor, Wadsworth," the Englishman sneered, "a gentlemen crook has to be, I fancy. You and, your cutthroat, thieving gang were after us from the start"—

"My cutthroat gang!" As udden light broke on Waddy. He seized the other by the shoulders. "Look here, man! All through this affair I've been mistaken for someone else! For a long minute the two stared into each other's eyes. Then the Englishman sagged weakly against the library table.

"By gad!" he exclaimed. "Are you giving this to me straight, Wadsworth? But you know the ritual. Can you prove to me—?"

"Feel this scar on my head!" commanded Waddy. "That is where they slugged me out on Hampstead Heath when they wanted to search me. If by 'ritual' you mean those numbers, it is easy to be explained how I came by them. What the devil does it all mean?"

A smothered axclamation reached her from the other side of the panel and then a sharp command:

Phyllis had only time to shrink back schen the bolts snapped and the door hurst in upon her. At the same moment a key rattled in the lock of the bedroom door behind her and with a booking cry Phyllis sprang into the strange apartment beyond. It was a bothing a tall, gaunt apparition clad in a peculiarly ugly and barbaric funging robe. Besides desiring to eliminate each other, the two teams have a tie to break, each team having won a contest during the early part of the season. The Baptists defeated Chattanooga in Macon by 7 points, while Mercer lost when they met in Chattanooga. If Mercer plays as she did Saturday night, the team will be hard to beat.

Tonight at 9 o'clock the Georgia Bulldogs will meet the Carolinians in a game which promises to be a fitting close to the third day of the great tournament.

BY EDWARD W. COCHRANE. Now that the winner of the Harry Greb-Tommy Gibbons battle, to be staged in New York March 13, virtustaged in New York March 13, virtually has been assured a contest with Jack Dempsey for the world's heavy-weight championship, interest of puglistic followers in this country will be centered in the activities of these men until they clash, after which the winner will be given the bulk of the

attention, naturally.

Both boxers know that they must win decisively to be able to carry pub-lic confidence with them if they enter lic confidence with them if they enter the ring against the king of fistiana. Therefore, they are putting forth every effort to be in condition to win in this manner. Greb believes in keeping busy in ring engagements, while Gibbons does not appear quite as often, but pay strict attention to gymnasium training.

Miske Worthy Foe.

The Pittsburg fighter has been boxing weekly for some time, and this week he will take on Billy Miske for twelve rounds in Boston, unle's there is an eleventh-hour postponement,

is an eleventh-hour postponement, which doesn't seem likely. This likely will be his last appearance before the Gibbons fight, but it will furnish a real test for him.

Miske isn't the scrapper he was when he stepped through two no-decision fights with Dempsey, one of six rounds and one of ten. In their third meeting Miske was but a shell of his former self, and was an easy victim for the crashing blows of that Salt Lake City fighter. Miske was suffering from a nervous ailment at that time, but recovered later and in his last three or four fights he has made a very creditable showing. In fact, he went so well against Bill Brennan in their last meeting, beating the New Yorker for ten rounds—the distance of the battle—that it was freely predicted he could make a good showing against Dempsey if given another chance. If R. J. Spiller, president of the Atlanta Baseball association, stands pat on his recent assertion that but twenty-six bull players will be transported to Bay St. Louis for the Crackers' spring activities, Old Man Public need scan the newspaper columns to more for additional annuaurogeness.

Knockout Would Help. "They charge me with occupying first base with a veteran too old to know anything further about baseball, and yet it was only by the sweetest kind of overtures that we were able Twenty-six contracts have been signed, sealed and delivered, and the stage is set at the bay for the invasion of the Frankmen. Word from yor Bob Webb has it that the citizens of that fine little gulf city are waiting to welcome the players, just as they have done for the past two seasons.

Spiller, who stated yesenough to stick with Atlanta, I am happy to give them a chance. But if Miske is clever, fast, a great defensive fighter, but not a terrific puncher. He is a mighty hard man to beat because he is in perfect condition. Greb is faster than his foe, and if the bout goes the limit he should outpoint him. He must outpoint him with Dempsey. Greb has learned more about hard hitting since he has been under the management of George Engle, and if he is lucky enough to put over a knockout punch, which doesn't seem likely, he will look like the best bet against the champion and a sighty dangerous foe for Gibbons March 13. dangerous foe for Gibbons March 13

There is age and youth enough in the catching department to satisfy the most critical of local fandom.

Personally, we cling to the youthful element in baseball, preferring the youngsters to the men that have given their lives to the development of the pastime, but so far as the Crackers' catchers are concerned, we see no reason why it should not meet with the approval of Atlanta fans.

If Bill Rariden isn't sulking from the loss of prestige that accompanied the string over the carterin's toget to down at St. Louis this week, according to schedule, but shouldn't encounter much trouble there. He has boxed Miske, Bob Martin, Brennan and most of the rest of them and has come out on top on most occasions.

Roper really is worth considering although he doesn't seem to get anywhere with his demand for a battle If Bill Rariden isn't sulking from the loss of prestige that accompanied his giving over the captain's toga to Roy Ellam and will report to the locals, he should easily make the best catcher in the league. Bill isn't a spry, young thing by any means. He has been tried in the fine old school of experience, but he is still young a plenty to take his turn behind the platter and give forth some mighty with Dempsey. Roper is almost as large as the champion, polished off Brennan in fairly easy style and Brennan went twelve hard rounds with the champion. So it would seem that the

platter and give forth some miguty good service.

If there is any place on the staff in which a veteran fits nicely it is the catching position, especially when there are a bunch of kids flinging the balls to the batter. But if you are prejudiced against Rariden on general principles, there are other candidates that are simply bubbling over with youth. Some on the list are platter and give forth some mighty

Johnny Suggs, Phil Bedgood, Buddy Napier and Dewey Marshall are the slabmen left from last season that will be carried to Bay St. Louis.
Suggs and Napier are the two on whom most of the work will be shifted. Bedgood and Marshall look to be good pitchers in the making. If they show the proper sort of form, Dutch Frank's problem of bringing a pennant Atlantaward will be solved to a considerable degree.

Other pitchers that have been ordered to report to the training camp MUST PLAY BALL.

Boss Spiller has received a number of letters which will rival our own collection from baseball fans who are far from satisfied with the players the Crackers have signed. The chief complaint in his communications, as in ours, is that the futher Frankmen have cuttived their usefulness, on the discontinuous continuous continuous.

That should prove a rather starting announcement to fans who had just started to figure how many ambulances it would require to transport the Atlanta ball team to and from the park, and how many crutches Mr. Spiller would have to order to make it certain that all the players could hobble to breakfast before the last bell rang.

"I don't see where the fans get the idea that I am conducting a home for old hall players," he declared. "I am willing to admit that in one or two spots the candidates are far from being blushing lads of sixteen summers, but, on the other hand, the men are far from their dotage and have many good seasons left.

ACTIVITIES AT | College Athletics Discussed By Prominent Army Officer

Editor's Note—The following article was received yesterday from Major Craig, who is a nationally known authority in college sports. There are some fine points brought out touching a situation that is beginning to attract considerable attention in the United States

BY MAJOR LOUIS A. CRAIG. (Fort McPherson)

Questions relating to college athetics are frequently before the public eye. The subject of athletics is interesting to the press-reading public. Athletic prowess is an admirable quality among Americans. The place of athletics in the colleges is probably not altogether understood nor is it given a great deal of thought. What is the object of athletics in college? How should it be conducted and what is its relationship to other activities, generally considered?

Athletics should be primarily form of pleasant recreation, affording physical benefit at the same time. The element of competition tends to increase interest, hence the contests and seem to follow, therefore, that the in-stitution having the greatest percent-age of its personnel engaged in some form of athletic activity would have the healthiest average of minds and bodies. There is no question that physical betterment follows prudent and systematic exercise, and that the efficiency of mental activity is there-by increased. Therefore, athletics should have a very prominent place should have a very prominent place in the life of the student body. It is a positive aid to his academic suc-

It would seem that in some insti-tutions the athletic tail wags the dog. The primary interest of the student body is centered in its team. THE TEAM has come to represent the col-lege as nothing else does. The stu-dent body subordinates its very in-terest to the service of the team. College spirit and loyalty to the institu-tion are centered, and very emotionally demonstrated, in that service. No sac-rifice that will further the interests of the team is too great, be it to take an active part on the field or to mere-ly hold a player's sweater. The grind, who devotes some or all of the practice period to his books—the free lance period to his books—the free lance who prefers to take his recreation in some other manner, are rather likely to earn the outspoken disapprobation of their fellows. Where this general

of their fellows. Where this general condition exists, the major interest of the student body is taken from its legitimate channels and the body as a whole is losing the opportunity and incentive for physical betterment.

There is another phase of college athletics to be considered—the very specialized training undergone by the individual members of certain teams. In some of the more violent sports, it is doubted if the participant is benefited. Aside from the more or less permanent injuries resulting from many athletic contests (and these injuries far from offset the character-

building qualities of the game) th high efficiency of training to m immediate future needs, is badly immediate future needs, is badly cal-culated to meet the more distant fu-ture needs of the individual. In other words, the severity of the training, under a professional guidance, deval-ops a physique that is splendid in the present, but that is subject to fatty degeneration and attendant disease in the future. This training for the in-tercollegiate contests demands a trai-of coaches and trainers, who are highly paid for their work. The expense incident to the training and equiply paid for their work. The expense incident to the training and equipment of certain teams is tremendous. Hence the necessity of gate receipts and commercialized methods in order to pay expenses. Both the specialized training, and the commercial aspect of the situation, seem to be inconsistent with the idea of recreational exhibition. athletics. Hold of Interest.

The hold of intercollegiate contests upon the interest of the student body upon the interest of the student body is so great that any scheme aiming at their elimination would meet with strong opposition. The athletic prominence of many institutions is, again; an excellent advertising medium and tends to attract a following outside of its normal field. And it is very seriously questioned if it is desirable to eliminate intercollegiate contests entirely. Since seasons of training are usually directed to obtaining the best-chances of victory in one game onto chances of victory in one game only, and since the success or failure of a team's season is not measured by fits proportion of victories, but rather proportion of victories, but rather upon its success in a single game, it might be a step in the proper direction to limit the number of intercollegiate contests. The period in which the individual members of a team could train as a unit might also be limited. The best method of developing material for the one, or few intercollegiate games, would then depend collegiate games, would then depend upon having the maximum number of teams engaged in interclass, interdorm-itory, or similar games. This would tend to greatly reduce over-specialization, physical strain and professional
coaching. The more or less general
elimination of professional coaches,
trainers and other specialists that
have grown out of the existing system, should be aimed at. It goes
without saying that an efficient staff
of physical directors, as such, is a
necessity in any college.

The country wants red-blooded men,
men who have been schooled in selfcontrol of strength with their fellows,
who lose a game, or win it, with
equal grace. We want as many as
possible to pass through that mill. We
want an active athletic spirit in our tend to greatly reduce over-specializa-

want an active athletic spirit in our colleges rather than a general rooting spirit. A protest against the present system is being heard from several sources. It appears that the time is ripe for constructive betterment.

Waycross Lassies Win South Georgia Cage Championship

Waycross. Ga., February 26.—
(Special.)—Before a crowd that packed the Municipal hall to its capacity, the local Girls' High school basketball team last night defeated the Savannah High school 9 to 8. The game decided the championship of south Georgia, and with championship honors looming before them, both teams fought through the last minute of play. Neither team had suffered defeat from a Georgia school during the season and both teams entered the game determined to win. game determined to win.

During the first quarter the locals played the visitors off their feet, but seemed to have trouble in locating the basket. At the end of this quarthe basket. At the end of this quar-ter Captain Hardy, star forward, around whom the offense of the local was built, was forced to leave the game with an injured shoulder. With the retirement of Miss Hardy, the offense of the local girls ceased to function. During the remaining three-quarters the two teams battled to quarters the two teams battled to a draw. With two minutes to play and draw. With two minutes to play and with the visitors leading by 2 points, Miss Luther substituted for Miss Hardy, rang a sensational field goal which was followed by a foul goal by Miss Norton, and the game ended with the locals leading by 1 point margin.

A scene of wildest confusion followed the end of the game.

BIRD WINNER

IN BIG RACE

The cold facts stick out and stare us in the face so plainly and the proofs are too positive and overwhelming at this time for any farmer to doubt that will give in the great national prep track meet held at Baltimore under the auspices of Johns Hopkins university, won third place in the preet as the result of Collins Bird, it lone entree winning the 600-yard race. The news was received in a wire from Collins Sunday which was sent to W. O. Chaney, principal of Tech High.

Collins is one of the best track men in the state and his showing in the 600-yard race which was participated in by representatives of many of the largest schools in all parts of the country, indicated that he will give enter the handwriting on the wall country, indicated that he will give is sucidal in the extreme.

"The cold facts stick out and stare to realize that he can get from one-half, to two or three cents a pound more for his cotton when he plants seed for selected staple instead of any kind of lint, it will only be a question of lint, it will only be a question of time before our section would be known as a good staple section belt, and owing to their high yield of lint they have gained fauth to the financial undoing of the farmer. That such a mistake and will so the small farmer by any means. That some of our largest and best farmers made the mistake and will continue to do so for a few more year."

Chaney, principal of Tech High.

Collins is one of the best track men in the state and his showing in the farmer's obligations to himself and family nor excuse his business judgment at a time when any can easily see the handwriting on the wall easily see the handwriting on the wall easily see the handwriting on the wall and continue to grow cotton wall or realize that he can get for selected staple instead of any kind of lint, it will only to realize that he can get for selected staple instead of any kind of lint, it will only to realize that he can be to realize that he can be farmer to doubt that this time fo

"Every farmer win agree with me that to make cotton at a profit under present conditions we must do every-thing possible not only to increase the yield per acre, but to increase the re-turns from the cotton when sold. Whether all agree or not the facts are that we are losing more today from the quality and length of staple and the method of handling and marketing than we are from the ravages of the dreaded boll weevil. That we are losing most of this through neglect of quality and length of staple I do not doubt.

Change Must Be Made.

"The day of reckoning is at hand, as we shall presently see from the proof I will submit and which is only a sample of a hundred I could submit if space permitted. When I mention length of staple I have reference, of course, only to the different lengths of short staple and not to long staple cotton. Practically all farmers of this section know, as well as I do, that much cotton is being grown at the present time with staple of 5-8 to 7-8-inch. They know which varieties these are. They know which varieties these are. They know also that there are others which run an inch or better. What they do not know or have not in the past, or are not now willing to admit, is that they are receiving from \$5 to \$25 per bale less for this cotton \$5 to \$25 per bale less for this cotton than the best of the short staples are worth. "The day of reckoning is at hand,

"They have been prone to fool themfrows Cleveland Big Boll College No.

1 or some such variety, and therefore
they are getting the top of the market.
That they have been getting as much
as their neighbor I will admit, but
nothing could be further from the facts
than that they are getting the top of
the market simply because their neighbor with good inch or better staple has been forced to take their price instead of him getting the better staple. Any

produce sells according to the poorest of the lot, not the best, as can be verified any day, on the cotton yard, by observing the price paid for a bale with a bad side and a good one in a crate of fruit a part of which is of very poor quality.

Case of Hiding.

"This is invariably the case unless the poor can be hidden with the good. The cotton of poor staple has been hidden and overshadowed to some extent by that of better quality for years, but that this can not longer be done I will show by quoting a letter received from the Exposition Cotton Mills, of Atlanta, Ga.:

"On account of the shortness of staple and weakness in breaking strength we are

"The Exposition Cotton mills is only an example of what has happened to our cotton market here and what hundreds of mills have been forced to do, in various sections of the country, but this is not all. To give some 'dea of the loss entailed by the farmers on account of introduction of these ruinous short stanles I

surely as we continue to grow cotton and continue we will, it has got to come, and the sooner the better.

North Georgia Losing Out. "There was a time when a man could be proud that he was handling north Georgia cotton as it was the standard by which most of the mills south and east bought their supply, but the introduction of chaffy short but the introduction of the staple varieties is making our once boasted standard a joke and is driving some of our best customers, the exporter and the eastern mills, to other sections for the kind of cotton they are the sections for the kind of cotton they because the sections for the kind of cotton they because the sections for the kind of cotton they because the sections for the kind of cotton they because the sections for the kind of cotton they because the section of the secti sections for the kind of cotton they demand and must have. Not only this, but mills right at our very door are going elsewhere for their cotton when they much prefer to buy from us.

Larger Yield Is Deceiving.

follows:

There is no doubt that cotton having the staple of 1-inch or more will command a ready premium on almost any market in this country if that fact is once well established. It is suicidal policy on the part of our people to grow cotton of less than %-inch staple. It is true that the market in this section of these undesirable types of cotton. The farmer is of the opinion that he is getting a large amount of lint and, therefore, his tendency is to emphasize their cultivation. No distinction appears to have been made by the mills until recently with reference to the length of staple. A greater discrimination is now, however, being exercised by the purchasers of mill products and by the mills themselves. The future of the cotton industry in this section will be affected a great deal therefore by all length and character of staple produced. There is no trouble in the world about producing a very superior staple of cotton in your section. It is just a question of selecting varieties that have been standardized and been to hy rigid awatem of seed selection.

"The question is certainly more serious than most people seem to think. Co-operative marketing associations are all right, and I believe in them, but for any cosociations are all right, and 1 per dieve in them, but for any cooperating marketing association to do the farmer the most good, no matter along what lines it is working, it must have something worth while to prosper or survive unless it had a worth-while animal to offer the public. No individual, or group of individuals, can put off a bad article on the public and continue to fool all the people. The citrus growers of Florida or the great fruit exchanges of California were not organized to put off cheap of trashy fruit on the public, but rather to exploit a superior product and then to find a market and secure the top price. My impression is that co-operative marketing associations are being formed here for the very same purpose, hence my appeal to the people of Cobb county to produce a grade of cotton that will regain for us our lost reputation.

putation.
"We no longer exercise a monop-At the present time about 40 per cent of the world's supply of cotton is produced abroad, and unless we can correct many of the abuses that are associated with the growing and hadling of the crop here that percentage is likely to be greatly increased. It is at least coming to a showdown, and in a showdown of this kind equality will always be the winning hand.

"As long as the crop is short the short staples can be sold at some price, but always at a loss not only to the grower but to his neighbors as well who sell according to the standard of the section which, as heretofore stated, is based upon the quality of the poorest staples, since they have to be taken along with the rest.

"A good grade and length of staple with proper handling will come nearer beating the bool weevfil than any other one thing. I hope the farmers of Cobb county will try it."

ATLANTA, GA., Feb. 21, 1922

Atlanta Constitution,

Advertising Department.

Gentlemen:

It may be of interest to you to know of the splendid success I have just recently had in my sixteen-day sale, a great deal of the credit for which I GIVE TO THE ADVERTISING COLUMNS OF YOUR PAPER.

I put this sale on at a time when business was very quiet, and in the face of much advice from some of my friends that I "couldn't pull it off successfully."

But with my prices marked exceedingly low, backed by the reputation I hope I have for handling good clothes and furnishings, and then with a moderate amount of well displayed space in THE CONSTITUTION, my sale went over BIG. On several days during the sale I had to lock my doors at different hours to hold the crowds back.

While I used all the Atlanta papers to some extent I HAVE ALWAYS CONSIDERED THE CONSTITUTION THE BEST MEDIUM FOR MY ADVERTISING, and in this sale I used by far the greatest amount of space in your paper, and can truthfully say that the results it brought me -- in fact that The Constitution has brought me at all times -- were gratifying indeed -- much more . than I had hoped for.

All of which goes to show that with goods of value, with prices right, and with well-written and properly displayed copy in the columns of THE CONSTITUTION, almost any kind of a sale can be made successful.

treaty.

Reservations offered and defeated in committee will be again proposed from the floor. Senators Borah, of Idaho, and Johnson, of California, will lead the fight against the pact. The compromise reservation does not meet their approval.

But leaders are confident this treaty and the others will be ratified without great delay. No reservations will muster more than a dozen votes from either party, they declare.

will muster more than a dozen votes from either party, they declare.

Discussion of the four-power treaty will follow a vote on the American-Japanese pact on Yap. Leaders are ready to force a decision on this treaty, which has been before the senate for more than a week, with only desultory debate.

The committee, meantime, will turn its attention to the general Far Eastern treaty and the Chinese customs tariff treaty, which have so far had little consideration. Opposition to them is expected, on the ground that China was not given the things to which she was entitled.

PRAETORIANS DENY THEY ARE LIABLE FOR "SLAPPERITIS"

The Modern Order of Practorians, which is being sued for \$20,000 damages by Mrs. Mexia Osborn, of 510 South Pryor street, for injuries, alleged to have been sustained during her initiation into the local order of the Practorians, when it is said that she was spanked with an instrument known as a "slapperitis," which exploded a blank cartridge, has filed answers and demurrers to the suit.

The answers allege that the use of such an instrument as a "slapperitis" in initiating members is not authorized and that if the plaintiff was injured, as set up in the suit, it was the fault of the man wielding the instrument and not of the order.

Four demurrers and four answers were filed to the suit by Attorners Alston, Alston, Foster & Moise, representing the Atlanta Council No. 752, of the order; R. E. Latherman, state manager; The Modern Order of Practorians of Texas, and C. M. Robertson, member solicitor.

The case will probably come up at the next term of Fulton superior court although it has not yet been set for trial.

THE CONSTITUTION, ATLANTA, GA., MONDAY, PEURUARY 27, 1922. ACCIDENTAL SHOT RESULTS IN DEATH OF WILLIAM STILL To Enter Apartment

William R. Still, 19 years old, died at midnight Saturday at the Davis-Fischer sanitarium here as a result of wounds received when Cliff Haney shot him accidentally with a shotgun Cleveland, February 26,-Failing in efforts to gain entrance to an apartment here, where it was reported a ing, police today resorted to a "tear"

of wounds received when Cliff Haney shot him accidentally with a shotgun four mile east of Lawrenceville last Friday night. Still is said to have made a statement before his death exonerating his slayer of any intention of shooting him.

Friday afternoon Haney and Albert Peppers had an argument at Lawrenceville, the cause of which has not been learned. That night Peppers, with his brother, picked Still up in their buggy and took him to Haney's home. When they arrived there, Haney got his shotgun and shot Albert Peppers and also Still. Peppers is expected to live. Haney claims that he had no intention of shooting Still. He is out under bond.

The deceased is survived by his father, W. A. Still; mother, and several brothers and sisters. bomb. The officers said they were defied because they had no search warrant and were warned by the occupants that they were heavily armed.

Thereupon one of the officers went to police headquarters for a "tear" bomb, which had been left there by a salesman as a sample.

A window was broken and the bomb thrown inside. The result was almost instantaneous. Four men and three women surrendered and were taken to police headquarters for investigation.

CLARKE COUNTY SUNDAY SCHOOL SESSIONS OPEN

Washington, February 26.—Net operating income of railroads in the United States, sums available for in-terest, dividends, rentals and surplus Athens, Ga., February 26.—(Special.)—An address by Dr. M. A. Honline, of Pasadena, Cal., featured the opening session this afternoon of the annual convention of the Clarke County Sunday School association in session at the First Methodist church. The convention will be in session through Tuesday evening. In conjunction with it, the school of methods is meeting. Monday afterterest, dividends, rentals and surplus of the corporations owning the properties amounted for 1921 to \$615, 625,619, according to compilations made for and issued today by the Association of Railway Executives. This, was computed by the association to represent a return of 3.31 per cent on the tentative valuation fixed upon all railroad property by the interstate commerce commission, and covered reports from all of the class 1 railroads which operate the greatest proportion of American railway mileage. The total operating revenues for 1921 were given as \$5.569,888,000, or 10.6 per cent less than for 1920. Total In conjunction with it, the school of methods is meeting. Monday afternoon's program consists of addresses by Miss Cora Holland, Dr. Honline, of California, and James A. Morton. At Monday night's meeting. Colonel Aut Nix, of Athens, R. D. We are now ready to exhibit plats of this subdivision and will be glad to quote prices to prospective customers. to exhibit plats of this subdivision and want be also to this block, but prospective customers.

In the past we have had numerous inquiries for lots in this block, but have never been in a position to quote prices, as the block had never been subdivided into lots. We believe that customers will be impressed with the reasonable prices and the liberal terms upon which these lots are now offered for sale. Every lot is supplied with water, sewer, and gas connections; all stubs are run under the sidewalks to the property line, electric lights and telephone service will be available. We would be glad to have any one call and let us show the plats of this subdivision.

REPUBLIC TRUCK SALES CORPORATION

ATLANTA BRANCH

February 25, 1922.

Hon. James L. Key,

FACTORY BRANCH

Mayor of Atlanta.

In compiling our proposals for the consideration of the Purchasing Agent we contributed our entire distributor's profit to the City of Atlanta, feeling that this was our opportunity to co-operate unreservedly in the reduction of the city's expenses, and help a project that would make Atlanta a better place to live in.

It is usually understood that when a municipality advertises for bids, that they are seeking to purchase on a competitive market. In this instance the city was seeking transportation, and by the usual impression they were seek-

ing transportation at the lowest possible cost. The purchasing committee, in their recommendations to the finance committee, selected several trucks, which in their opinion were suitable for the purpose required, apparently without consideration of the cost to the city, which

is unusual on a competitive market. The lowest bids of the Republic Truck Sales Corporation were omitted in the report that accompanied the Purchasing Committee's recommendation to the Finance Committee, who cut down the quantity of trucks recommended by the Purchasing Committee but otherwise followed the Purchas-

ing Committee's recommendation. If Republic Trucks were purchased for the revised quantity approved by the Finance Committee, the saving to the city would be \$1,219.00 per truck on the 3½-ton trucks, or a saving of \$7,314.00; and on the 2½-ton trucks of \$1,000.00 per truck, making a total saving on the 10 trucks for the Sanitary and Street department of \$11,312.34. For the Water department, the Purchasing Committee recommended the purchase of a one-ton truck, to cost the city \$2,256.35. The Republic's bid on this truck was \$1,238.31, a saving of over \$1,000.00 there, making a total saving to the city on these units of over

\$12,000.00 on the 11 trucks. The objections stated, when the bids were opened, to the Republic was the absence of radius rod. This is rendered unnecessary by the use of the Hotchkiss Drive system. The feature of the Hotchkiss Drive system is the utilization of the front half of each rear spring to connect the axle to the frame. The spring, if properly designed and mounted, accomplishes this function in a very satisfactory manner, thereby saving 70 to 100 parts, which compose the radius rod and the Torque Arm equipment used on other makes of trucks. It is a leading feature of Republic policy to avoid unnecessary parts, not only for their cost, but for their weight, and their invariable increase

of maintenance, attention and expense. This reminds me of a story of a young man by the name of Goldbloom, when asked why he broke off his engagement with Kitty O'Riley, who was not only a beautiful girl of physical perfection, but was intellectual and worth a bit of money, stated that he did

not like the shape of her nose. Our method of manufacture may not conform to the individual ideas of construction, but comparative tests of Republic Trucks in the city service will prove their dependability, and we have repeatedly stated that we welcome comparison under any conditions where the opportunity is equal. Perhaps it is not the city's intention to save money in the purchase of equipment; or there may be some question as to the dependability of Republic Trucks in the city service. If it is the latter, the Republic Truck Sales Corporation is willing to eliminate the question by furnishing an equitable guarantee that our

trucks will properly perform the service required of them. Republic has more Motor Trucks in use than any other exclusive

truck manufacturer. Following is a list of Municipalities using Republic Trucks:

New York, N. Y. Montgomery, Ala. Sherbrooke, Que. Oakland, Cal. Kansas City, Mo. Pensacola, Fla. Los Angeles, Cal. Washington, D. C. Rockford, Ill. Taunton, Mass. Braintree, Mass. Tampico, Mex. Alma, Mich.

Omaha, Nebr. Blackfoot, Idaho. Hyattsville, Md. Little Falls, N. Y. Clifton Forge, Va Augusta, Ga. Knoxville, Tenn. Gallup, New Mex. Louisville, Ky. Rocky Mount, Va. Duluth, Minn. Marion, Ohio. Penticton, B. C.

Ithica, Mich. Vancouver, B. C. If a further list of cities using Republic Trucks is desired we will

be glad to forward it to you. In Georgia 11.7% of the trucks registered in the State, exclusive of Fords,

are Republics. There are 806 Republic Trucks on the 1921 registration. Only fifteen truck manufacturers are represented in all States. Republics, with the exception of Fords, lead in each—and Republic popularity ranges from 3.2% in New York State, with 3,660 Republics, to 41.9% in North Carolina, With 1,285 Republic Trucks.

We maintain a factory branch with adequate stock of parts in Atlanta at 15 Currier Street, and we acknowledge the reputation for UNEQUALLED SERVICE.

Surely these representations entitle us to more than a passing thought in your deliberations at this time.

Yours very truly, R. F. STUART, Manager. ATLANTA BRANCH REPUBLIC TRUCK SALES CORPORATION.
